-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. This application contains claims 9-14, 16-19, 20,22-24 drawn to an invention nonelected with traverse in Paper No. 2. Applicant needs to cancel those claims.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 3 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Komaili et al. (U.S. Patent No. 6529730 B1).

With respect to claim 1, Komaili teaches a data rate controller system for providing control instructions for a network (Fig. 1), the system comprising:

a plurality of channels, each channel having at least one associated encoder (col. 1, lines 45-50); and

a central controller operable to receive statistical information (200 in Fig. 2), including lost-frame-rate information, about each channel, operable to determine a type encoder that should be run on each channel based on said statistical information, and operable to send a

control instruction to each channel to facilitate implementation of the determined encoder (bridge paragraph between col. 2-3).

With respect to claims 3 and 8, Komaili also teaches wherein the central controller determines if the lost-frame rate is above a set limit and generates the control instruction base upon this condition (col. 19, lines 39-45).

***Allowable Subject Matter***

5. Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form PTO-892.
